

# SAFE - Zone System (for corporate customers)

## The challenge ?

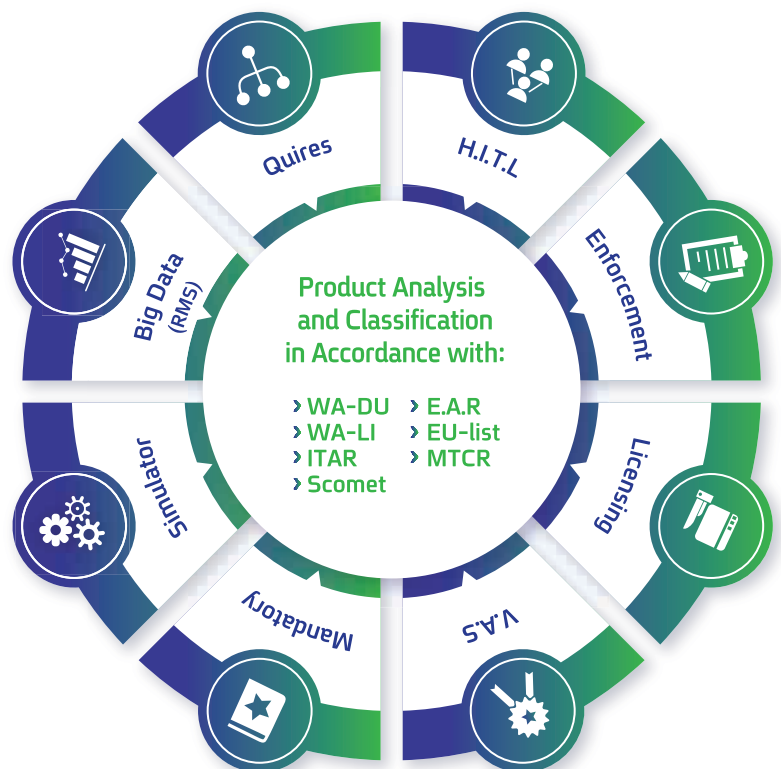

- Export licensing Process is **tedious**, prone to errors and sub-optimal.
- **Classification** is based on international and local regulation.
- Validation that export documents comply with the different regimes is done **manually** by technical and regulatory experts.
- Approvals involves multiple **agencies** reviews in each country.
- Approval of documents, and product Classification of Defense or Dual Use, can **delay licensing** for months, adversely affecting TTM (time to market) and business competitiveness.
- Exporters are **held liable** for errors in product classification, and can be prosecuted via administrative fines, confiscation of shipments, criminal proceedings or revocation of export licenses.

## The answer !

- Automated support decision tool.
- Efficient.
- Available on local, Web and Mobile.
- Fast transit and transshipment checks.
- Ideal training tool for new officers.
- Reliable.
- Personalized for specific needs.
- Routinely Updated.
- Adaptable.

By using SAFE-ZONE you can avoid

- Fines that can demolish companies
- Sentence of imprisonment to the top management
- Destruction of value for the shier holders
- US ban
- Reputation damage
